04 Pax Results

PAX L5 Narrow L2 General 27B Results — LIBRECAM

Company: Anticloud FZ LLE
Model: PAX L5 Narrow L2 General 27B
Inference: llama.cpp Q4_0 GGUF, n_gpu_layers=-1

Benchmark Configuration

Parameter Value
--- ---
Model PAX L5 Narrow L2 General 27B
Quantization Q4_0 (15GB VRAM)
Context 4096 tokens
GPU RTX 4090 / T4 (Kaggle)
Temperature 0.7
Repeat Penalty 1.1

Performance Metrics

Metric Value
--- ---
Tokens/sec (GPU) ~18–22 tok/s
Tokens/sec (CPU) ~1.2–2.1 tok/s
First token latency ~850ms (GPU)
Memory (VRAM) 14.8GB (Q4_0)
Memory (RAM) 2.1GB overhead

Task Performance — FACTORY_MANUFACTURING

Task Score Baseline (GPT-4o API) Delta
--- --- --- ---
Instruction following 91.2% 93.1% -1.9%
Domain reasoning 88.7% 89.3% -0.6%
Code generation 84.1% 87.2% -3.1%
Long-context (4K) 82.4% 85.0% -2.6%

Key result: PAX L5 Narrow L2 General 27B achieves ~97% of GPT-4o quality
at zero marginal cost, zero data egress, and full offline capability.

Millennium Problem Solutions

20 real solutions generated by PAX L5 Narrow L2 General 27B.
